Ted The Supercrow

by Miloslav Číž (drummyfish)

This is a scanned comic I was drawing some time around the year 2001, i.e. when I was about 11 years old.

I recently (2024) found it, scanned it and did some cleaning of the graphics with GIMP. The order of the episodes was not preserved so I ordered them so that the plot makes sense.

The English version was made by me by translating and manually overwriting them in GIMP, sometimes trying to mimic the language mistakes I made in the original.

I give up completely all intellectual property I might have in this work. I release it into world-wide public domain under the Creative Commons 1.0 waiver (https://creativecommons.org/publicdomain/zero/1.0/).
